

PRODUCT TEARDOWN 2026

Tata Neu: Gen Z Engagement & Retention

Tata Neu is where students check out. It should be where they check in.

Students use Tata Neu for the big purchase, then the app goes dormant: the case's "Buy and Bye" syndrome. The opportunity is to give them a reason to open it without buying.

From transaction-led to relationship-led engagement

ONE ECOSYSTEM, PUBLICLY LISTED PARTNERS

BigBasket

Croma

Tata 1mg

Westside

Curiosity hook

Brand apps

Speed + familiarity

Tata Neu

Rewards at checkout only

Diagnosis (ours): not clutter or missing brands. Tata Neu is a catalogue, useful once a student knows what to buy.

One gap, one vertical: trust wedge, habit engine

Core gap: no reason to open without buying. Shift: transaction-led to relationship-led

Case 1 · The wedge: Trust + Convenience

PROPOSED*

Neu Circles

Trusted social discovery

Need: know what is worth buying

Returns for: a friend's recommendation

Essentials

Persistent shopping intent

Need: stop rebuilding the same basket

Returns for: weekly top-ups, monthly restocks

Case 2 · Habit side: Discovery + Cadence

PROPOSED*

Campus Drops

Relevant opportunities

Need: a reason to open with no purchase intent

Returns for: new, expiring drops

Neu Challenges

Weekly engagement mechanic

Need: a reason to join, return and share drops

Returns for: a weekly goal with a daily step

EXISTING

Foundation: connected Tata brands, NeuCoins (1 NeuCoin = ₹1), NeuPass

* Proposed, not existing. Challenges is the mechanic inside Case 2, not a separate product

Case 1, the wedge: trusted picks become reusable lists

- 1 **Recommend.** A friend explicitly recommends a product to a private circle. Nothing is inferred from orders.
- 2 **Discover.** The student sees it in the circle, labelled as a recommendation, one tap from the product page.
- 3 **Save.** She saves it to an Essentials list, such as Hostel Essentials.
- 4 **Reuse.** Next week or next month she reuses the list, removing or restoring items. No rebuilding, no auto-order.
- 5 **Return.** She comes back with planning already done. No fresh search needed.

WHY ONE CASE

Circles creates intent; Essentials keeps it. Alone, a recommendation is forgotten and a list has no discovery source. Both work across brands, which standalone apps cannot do.

Main risk: low network density. Essentials still works with zero friends.

* Illustrative concept. Not existing Tata Neu screens.

Case 2, the habit side: challenges make drops recurring

- 1 Mon · Discover.** A relevant campus drop appears: a partner perk, time-bound, with clear terms.
- 2 Mon · Save.** She saves it. An expiry reminder is set only if she opts in.
- 3 Wed · Share.** She sends a group offer to friends. It unlocks at a stated head-count.
- 4 Daily · Participate.** A weekly challenge adds one small daily step, like saving a useful item. No streak penalty.
- 5 Next Mon · Return.** She checks her progress and the new week's drops.

Main risk: partner readiness. Launch drops only where a partner commits. Challenges never require a purchase.

Campus Drops
This week · your campus

Fashion · Student perk
Campus-week offer
Ends in 3 days **Save**

Group deal
Unlocks at 5 friends
3 of 5 joined · by Sunday
Unlocks only if 5 join

Expiry reminders are opt-in.

Weekly challenge
Plan your week
Save one useful item a day

3 of 5 days done
No streak penalty. You get a reusable list.

SAVED · 1

Campus-week offer
Expires in 3 days

* Illustrative concept. Drops depend on partner participation; not every campus or brand has student offers.

Success is weekly meaningful action, not app opens

PRIMARY METRIC

Weekly Engaged Student Users (WESU)

Eligible students who complete at least one meaningful action in a week: act on a recommendation, reuse a saved list, save a relevant drop or finish a challenge.

Not counted: passive opens and notification clicks. WESU is WAU filtered for real actions.

* PROPOSED TARGET, NOT A RESULT

Headline outcome: student WAU +15% versus a matched control by week 8, lifted by WESU rather than notification opens. Engaged students average 2 to 3 meaningful visits a week. Baseline first.

SUPPORTING METRICS

Student weekly active users
Four-week retention
Repeat Essentials list use
Meaningful Circles actions
Drops saved, challenges done
Cross-category discovery

GUARDRAILS

Notification opt-outs
Privacy complaints
Unwanted promo exposure
Feature abandonment
Incentive-only engagement

ROLLOUT

- 1 Lists + private Circles
- 2 Campus Drops, where supported
- 3 Weekly challenges
- 4 Expand on evidence and readiness

THE RECOMMENDATION

Make Tata Neu useful **between purchases**, not just at checkout.

DIAGNOSIS

Tata Neu rewards the purchase but gives students no reason to open the app without one: the "Buy and Bye" loop.

TWO CASES

Lead with Circles + Essentials: cross-brand trust and planning that single-brand apps cannot match. Campus Drops + Challenges add the weekly and daily cadence.

WHY TATA NEU

A shared rewards currency and a connected brand portfolio let lists, circles and drops span categories, which single-brand apps cannot.

HOW THE PIECES ADD UP

Trust

Neu Circles

Convenience

Discovery

Campus Drops +
Challenges

RESULT

Repeat engagement

Weekly meaningful
action (WESU)

Each input gives a different reason to open the app between purchases. Together they move Tata Neu from occasional transactions to recurring engagement.
